

Intelligent electric towel rack installation and user manual

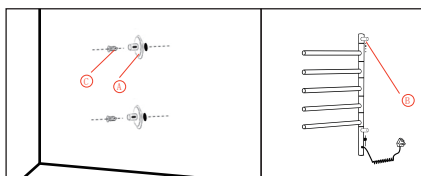

Punching installation

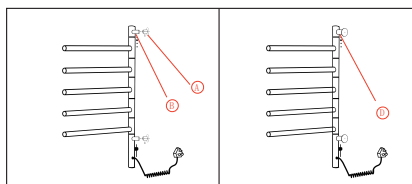

Step 1:

1. Select a suitable installation position on the installation wall according to the product model and make hole marks;
 2. Use an impact drill to drill 4 holes at the marked positions (please refer to the length of the expansion pipe in the accessory)
- Insert the expansion pipe (F) flush with the wall surface, and make a hole on the outer diameter;

Step 2:

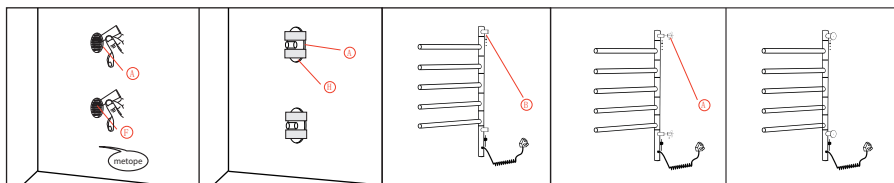

1. Thread the self tapping screw [C] through the fixed base [A] and align it with the position of the expansion pipe. After aligning it with the wall, use the self tapping screw to screw it into the expansion pipe for fixation;
2. Align the M6 screw [E] with the bracket [B] and install it into the hole on the back of the towel rack body, then tighten it;

Step 3:

1. Insert the main bracket of the twisted towel rack into the fixed base [A] on the wall;
2. Use M5 screws [D] to fix the main body of the towel rack to the fixed base [A], adjust the distance from the wall, and then use tools to tighten the base. Be careful not to install the product upside down.

Non punching installation

Step 1:

1. Select a suitable installation location on the wall according to the product model and mark it properly;
2. Clean the wall and apply nail free adhesive [G] to the back of the fixed base [A] and stick it at the marked position on the wall;
3. Attach the auxiliary sticker [H] to the fixed base [A] according to the diagram, wait for 72 hours for it to dry without nail glue, and then remove the auxiliary sticker [H];

Step 2:

1. Align the bracket [B] with the hole on the back of the towel rack body and tighten it with M6 [E] screws;
2. Insert the towel rack main bracket with the twisted bracket [B] into the fixed base [A] on the wall;
3. Use M5 [D] screws to fix the main body of the towel rack to the fixed base [A], adjust the distance from the wall, and then use tools to tighten the base. Be careful not to install the product upside down.

Product parameters

Product name: Intelligent electric towel rack
Product colors: black, white, gray
Product material: stainless steel
Surface technology: electrostatic spraying
Heating method: Carbon fiber dry heating
Installation method: drilling/no drilling
Waterproof grade: IPX4
Power timing: 0-9 hours
Temperature control adjustment: 30-70 degrees
Product power: 82W
Power cord length: Spring cord 1.2 meters
Product dimensions:
width 420 * height 660 * 80mm away from the wall

matters needing attention

The electric towel rack has a heating and drying effect, with a surface temperature of up to 70 ° C. Please pay attention to temperature control during use to avoid damage to towels and clothing caused by high temperatures. Pure cotton fabrics can withstand high temperatures, while polyester fabrics have low temperature resistance (polyester fabrics should not be dried above 55 ° C). It is prohibited to use fabric wrapped around the heating rod.

Installation video

instructions

- ← Temperature setting button: single press the temperature button to adjust 30 ° C - 70 ° C, increasing by 5 ° C
- ← Timer adjustment button: Press and hold to adjust the timer, with a timer time of 0-9 hours
- ← Power on/off (Press and hold for three seconds to turn on/off, flashing when the screen is turned off)
